

# Project Planning and Management

Environmental Consulting Services

**EARTH SYSTEMS LAO**  
Environment – Water – Sustainability

## CAPABILITIES

Earth Systems Lao recognises that the input of environmental expertise during the project planning phase will prevent costly and difficult problems at a later stage. Furthermore, a commitment to the environment will not assure successful outcomes without the development of appropriate policy, management systems, training and awareness raising programs.

## SERVICES PROVIDED

Services provided by Earth Systems Lao include the development of:

- Environmental management systems/ plans/ guidelines and codes of practice
- Best practice environmental management programs
- Training and awareness programs
- Risk assessments for industries, companies and individual sites

*Project management and planning team  
(Sepon Gold and Copper Mining Project)*

## RELEVANT PROJECT EXPERIENCE

Recent projects completed by Earth Systems Lao include:

- Provide training workshop for expatriate workers and supervisors working for Sepon Gold and Copper Mining Project, Savannakhet province
- Together with project staff and counterparts of the Department International Cooperation (DIC) within the Central Planning Committee, identifying information and training needs towards the regulative framework in natural resources and environment in Lao PDR (Lao-Danish Natural Resources and Environmental Programme, Danida)
- Provide Lao expertise to support the development of guidelines, which would enable the incorporation of transboundary impacts into EIA studies for the Mekong River Commission (MRC) in Vientiane
- Assist in the preparation of an Environmental and Social Management Plan (ESMP) for the Sepon Gold and Copper Mining Project in Savannakhet province
- Earth Systems Lao also provided inputs into the UNIDO project "Removal of Barriers to the Introduction of Cleaner Artisanal Gold Mining and Extraction Technologies" in Luangphrabang province.
